## OBJECTIVE

Aspiring Full Stack Developer and DevOps Engineer eager to apply development and cloud skills to build reliable, scalable, and high-performance applications.

## EXPERIENCE

January 2026 - April 2026

- **DevOps Engineer Intern**
  Restroedge Private Limited
  - Built and deployed containerized applications using Docker.
  - Assisted in deploying and managing applications on AWS (EC2, S3).
  - Automated build and deployment workflows using CI/CD practices.
  - Improved deployment consistency by implementing containerization.
  - Monitored cloud infrastructure to ensure high availability and performance.
  - Collaborated with developers to streamline deployment processes.
  - Troubleshot deployment issues, reducing downtime and failures.

July 2025 - August 2025

- **Java Full Stack Trainee**
  Vinayak India & Overseas
  - Gained hands-on experience in Core Java, Advanced Java, and web development.
  - Built and contributed to full-stack projects using Java technologies.
  - Worked with databases and implemented backend logic for applications.
  - Strengthened problem-solving and coding skills through practical assignments.

## EDUCATION

2021-2022

- **Maharshi Dayanand University, Rohtak**
  Bachelor of Science

2022-2026

- **Deenbandhu Chhotu Ram University of Science and Technology, Murthal**
  Bachelor of Technology (B.Tech)

## SKILLS

- HTML5
- CSS3 , Tailwind CSS
- JavaScript
- Node.js
- jQuery
- React.js
- DevOps
- JDBC
- SQL
- Swing
- Positive attitude to learning
- Creative Problem-solving

## PROJECTS

- AI Impact Reporting Generator
  - Developed an AI-based sustainability reporting system to estimate environmental impact metrics.
  - Implemented database-driven logic to calculate plastic savings and carbon reduction.
  - Designed a user-friendly interface for generating automated impact reports.

- AI Auto Category System
  - Built an AI-powered product categorization system for automated tagging and classification.
  - Improved product organization and SEO tagging using intelligent categorization logic.
  - Developed using JavaScript with focus on scalability and performance.

- User Management System
  - Developed a user management system with authentication and role-based access.
  - Implemented CRUD operations and data handling using JavaScript.
  - Ensured efficient data storage and retrieval for user operations.

## ACHIEVEMENTS & AWARDS

- Completed Programming with Python certification from Internshala, gaining hands-on experience in Python, data structures, and problem-solving.

## TRAININGS

- Web-Devlopment(Java Full Stack) - DUCAT

  Built responsive web applications using HTML5, CSS3, JavaScript, and Bootstrap.
  Applied UI/UX principles and modern front-end development practices.
  Implemented form handling and basic backend functionality
-
  - DevOps - DUCAT
  -

  Gained hands-on experience in CI/CD pipelines using Git,Docker during real-world project work.
  - Implemented containerization and deployment strategies for scalable applications.
  - Worked with AWS services to deploy and manage cloud-based applications.
  - Automated build and deployment workflows, improving efficiency and reducing manual effort.
  - Managed environments and ensured smooth application deployment and monitoring.

## INTERESTS

- Travelling and exploring new places and cultures
